Question 1

Below we will read in the Boston housing project data. The distribution of the data is located here. To make sure that the code below works, click:

Session -> Set Working Directory -> To Source File Location

```
housing <- read.table("housing_data.txt")
colnames(housing) <-
  c("crim",
    "zn",
    "indus",
    "chas",
    "nox",
    "rm",
    "age",
    "dis",
    "rad",
    "tax",
    "ptratio",
    "b",
    "lstat",
    "medv")
```

Make a plot of `crime` versus `medv` in the space provided below. Commit your changes and push the updated .Rmd document, along with the resulting PDF file.

```
### plot goes here
```
